

# GOLDEN BEAR AMATEUR RADIO NET PREAMBLE

QST, QST, QST. This is <your call> net control station for the Golden Bear Amateur Radio Net. My name is <your name> and I'm located in <your QTH>. This traffic net meets daily at 1900 hours Pacific Time on approximately 3975 kilohertz.

The net objective is to maintain a system capable of providing limited communication service if normal services are disrupted or unavailable.

Only traffic legal for transmission by amateur radio will be accepted. Third party traffic must identify station and place of origin.

The Net and its members assume no responsibility for the results of their effort to provide communication assistance as a free public service.

This is a wide-area directed net. We use one Net Control and three Area Controls who double as designated relay stations. All other stations please do not transmit unless invited by Net or Area Control or if you have emergency traffic.

Members are urged to be on time for roll call and to remain on frequency to assist with traffic. This will aid Net and Area Controls to conclude roll call rapidly and to expedite traffic. End of QST.

This net is now open for emergency traffic only. This is <your call>, Net Control ..... Are there any relays on emergency traffic?

Are there any stations with formal written traffic, QST's or contacts to list for the net? ..... Are there any relays?

Are there any mobiles in any area wishing to check into the Golden Bear Net?..... Are there any relays?

This is <your call> Net Control for the Golden Bear Amateur Radio Net. It is our policy to start in the North on even days and to start in the South on odd days. Visitors will be picked up after all traffic has been handled. Now let us open each area for traffic listings, mobiles and then roll call.

---

## Closing Statement

This is the Golden Bear Amateur Radio Net, a group of amateur radio operators gathered to handle traffic. The Net, its officers and members assume no responsibility for any communications on the net frequency, approximately 3975 Kilohertz, prior to 1900 hours or after the net is closed this date \_\_\_\_\_ 20\_\_, at \_\_\_\_\_ hours. Thank you.

---
